CHOOSE ANY DESIGN WITH 8 FUNCTIONS:

1 Glide Chair

Smoothly glides to your desired position by a push to the back of the chair. An adjustment screw under the seat adjusts the amount of friction applied to the glide system. A matching footstool is available to all chair designs, and provides vital leg support for increased comfort.

2 Push Recliner

The Push recliner is operated by a very light push to the back of the chair; the footrest pops out, as the back reclines into the TV position. A much harder push brings the recliner to the full Sleep position.

3 Synchron Motorised Recliner

Synchron Motorised Recliner is operated by a hand controller and motor, stopping in any position you want, also positions between the TV position and the Sleep position. The two button handset includes a Key Lock function as a safety measure, and it is very easy to operate.

4 Zero Wall

The built-in footrest is operated by a handle, which also can be used to move the footrest back into place. When the footrest is out, the back can be reclined by a little push to the back cushion, to the TV or Relax positions. The main feature is, it can be put much closer to the wall.

5 Zero Wall Swivel

This is a Zero Wall Glide recliner, like above, but with an additional built-in Swivel function on the base of the chair, which adds about 2.5 cm to the seat height of the recliner. The Zero Wall Swivel needs slightly more space in the room, as the swivel rotates 360 degrees.

6 Swivel Glider

This is a "Glider" or "Rocker" Recliner with a swivel function. It "rocks" back and forward on smooth hinges. The Handle operates the footrest. Note! The "rocking function" stops when the footrest is out, and the back can then be reclined to a full relaxed position.

7 1 motor lift

Offers 3 functions; (1) Moves the footrest out. (2) By holding on to the button, it goes smoothly to a Relax position, although not horizontal. (3) When fully upright, it goes slowly to the Lift Position. The two button handset includes a Key Lock function as a safety measure.

8 2 motor lift

One motor operates the back independently from the footstool. (Two buttons). The back almost goes to a fully horizontal sleep position. The 2nd motor is operating the footrest and the lift action (Two buttons). It comes with a 4 button handset, with a Key Lock function option, as a safety measure.

EAGLE Glide Chair

Dimensions
A-82 B-108 C-51 D-84 E-46

The EAGLE Glide Chair and EAGLE Synchron recliner is a modern "EAGLE Chair", in fabric or leather. The functions are explained in points 1 and 2 (left). EAGLE is also available in all the other Matrix functions 3-8. It features an adjustable flexi neck pillow as standard. Functions 4 to 8 all feature a chaise seat to footrest design for comfort and safety.

VALENTINE Zero Wall Swivel

The Main features of the VALENTINE Zero Wall Swivel are explained under point 5 (left). VALENTINE Design can be produced in all 8 options / function described. This product features an adjustable flexi neck pillow as standard, and a built-in manual adjustment of the headrest. Functions 4 to 8 all feature a chaise seat to footrest design for comfort and safety. Dimensions A-84 B-111 C-53 D-89 E-48

NORTON 2 Motor Lift

The NORTON 2 Motor Lift function and other model options are explained in point 8 (left). The NORTON features an advanced and comfortable back cushion. It has a built-in manual adjustment of the headrest. Functions 4-8 all feature a chaise seat to footrest design for comfort and safety. It is available as an option with a wood rail under the arms, and is part of the NORTON Sofa Family. Dimensions A-84 B-110 C-49 D-94 E-48

CHELSEA Synchron Motorised Recliner

with a passion for

CHELSEA Synchron Motorised Recliner functions are explained in point 3 (left). The CHELSEA design is rather modern, with a balanced and very comfortable Wing inspired back. Chelsea is suitable for both fabric and leather. Functions 4-8 all feature the chaise seat design, providing extra comfort and safety. Dimensions A-82 B-108 C-48 D-84 E-48

FANTASY WING Glide

FANTASY Glide function are explained in point 1. FANTASY features a modern and clean design, suitable for fabric as well as for leather. Functions 4 to 8 all feature a chaise seat to footrest design for comfort and safety. Dimensions A-84 B-109 C-53 D-89 E-47

MAGNUM 1 Motor Lift

The Main features of the MAGNUM 1 Motor Lift are explained under point 7 (left). The MAGNUM Design can be produced in all 8 options / function described. It is part of the MAGNUM sofa collection. These products main features are the fully adjustable headrests. A choice of 12 stain colours on the beech wooden frame or in Oak oiled or lacquered. Dimensions A-81 B-109 C-49 D-93 E-48

Dimensions:
A-Width
B-Height
C-Seat Debt
D-Total Debt
E-Seat Height

All dimensions which are referred to, are valid for the product as displayed above. The dimensions for other models of the same design will often be different for a different function. Generally the Glide Chair is smaller in depth, width than a recliner, while models with function 4 to 8 are even deeper and wider.
